

Upstream Scientist Bioprocessing

We're working on a challenging and incredibly exciting mission: to bring cultured meat to market. Stem cells are central to this process.

We are currently looking for an Upstream Scientist to join our bioprocess development team. As a member of our friendly and dedicated team, you will perform bioreactor cultures of stem cells and tissue constructs.

Full-time · Maastricht

What you can achieve

Be a crucial part of bringing cultured meat to market, having a massive positive impact on the world.

Collaborate with a friendly, international team of world-class scientists and engineers in a fast-paced and exciting start-up environment.

Gain experience and expertise in a range of different cell and tissue culturing techniques.

Develop and hone your skills of scientific thinking and analysis.

Your responsibilities

Perform large scale cell and tissue cultures in bioreactor systems.

Analyze, troubleshoot and optimize the bioreactor culture systems in collaboration with engineers and scientists of the bioprocess development & automation teams.

Collect, analyze, interpret and present experimental data.

Train & supervise junior members on the operation of bioreactors.

Assist in the smooth day-to-day running of the laboratory.

What we're looking for

Academic background (PhD) in Cell Biology, Life Sciences, Biotechnology, Bioengineering or related field.

>2y of experience with bioreactor cultures, bench-top or larger scale is required.

>3y of experience with mammalian cell culture.

Experience with culture of stem cells & microcarrier cultures is highly desirable.

Passionate about our mission, and excited about working in a commercial start-up environment.

A hardworking, organised and dedicated team-player.

Good verbal and written communication skills (minimum C1 level English).

Ability to commence soon (desirable).

Willingness to work on a shift schedule.

What you can expect from us

We are a small team working on an innovation that we believe will have a huge global impact. As part of this exciting project, we promise that you will get to:

- Enjoy an enterprising work culture with lots of freedom in your projects.
- Combine science with a commercial goal.
- Enjoy 25 days of paid leave per year.
- Work in the beautiful, historical city of Maastricht.

- Enjoy flexible working hours.
- As part of competitive remuneration, receive a bonus plan similar to stock options called Stock Appreciation Rights (SARs).

We really look forward to hearing about you. Please submit an application through our website: <https://mosameat.com/careers> and we will be in touch with you shortly. We are reviewing application on a rolling basis.

If you have any questions please reach out to HR@mosameat.com or to our team lead of bioprocess development Naya Moutsatsou at naya@mosameat.com

Mosa Meat is a cultured meat start-up based in Maastricht, The Netherlands. Our team created the world's first cultured hamburger - that is, real meat grown directly from animal cells rather than slaughtering an animal. Our aim is to make cultured meat a mass commercial product so that eating meat is more sustainable, kinder to animals and better for human health.
